

BAIRE GOWDA

Cybersecurity & AI Engineer | Full Stack Developer | MCA 2027

Bengaluru, Karnataka | +91 7975263501 | bairegowda1003@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cybersecurity-focused MCA student (3rd Semester) with practical experience in Python development, AI-powered applications, cybersecurity simulations, and secure system design. Hands-on exposure to vulnerability assessment, incident investigation, network security concepts, and log analysis through academic projects and industry job simulations. Passionate about identifying security risks, securing digital systems, and building resilient applications. Seeking Cybersecurity Analyst, SOC Analyst, Security Engineer, or Cybersecurity Internship roles.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, C

Backend & Web: Django, Flask, REST API design, React.js, HTML5, CSS3, Bootstrap

AI / ML / RAG: RAG pipelines, LangChain, FastAPI, ChromaDB, Sentence-Transformers, BM25 sparse retrieval, cross-encoder re-ranking, vector embeddings, LLM integration

Databases: MySQL, PostgreSQL — schema design, indexing, foreign-key constraints

Cloud & Tools: AWS (EC2, S3), Git, GitHub, GitHub Actions, Docker, Linux, Postman, VS Code, PyCharm

KEY PROJECTS

AI-Assisted Penetration Testing — Web Application Security | Python, Nmap, ffuf, Burp Suite, Kali Linux 2026

- Performed penetration testing on intentionally vulnerable banking applications (demo.testfire.net, zero.webappsecurity.com); identified 10 vulnerabilities including SQL Injection (CVSS 9.8) and credit-card data exposed in base64-encoded cookies (CVSS 9.1).
- Built 6 automated Python security scripts (SQL injection tester, XSS scanner, port scanner, credential tester, security-headers scanner); classified all findings under OWASP Top 10 (2021) and CWE with CVSS ratings.

Enterprise Research Assistant (ERA) — Secure RAG Platform | React.js, FastAPI, ChromaDB, GPT-4o-mini 2026

- Designed an enterprise-grade RAG application with guardrails against prompt-injection attacks, combining semantic search with FlashRank reranking and Chain-of-Thought prompting for reliable retrieval.

HLKNN Phishing Website Detection — Applied ML Security Research | Python, Scikit-learn, Jupyter 2026

- Extended the HLKNN classification algorithm for phishing-website detection on benchmark datasets; published as peer-reviewed research on Zenodo. [DOI Publication](#)

SafeWalk — Student Safety Web Application | FlutterFlow, GPS Tracking, Admin Dashboard 2025

- Built and deployed a live student-safety prototype with real-time GPS tracking, SOS emergency alerts, safe-route guidance, and an admin dashboard for incident monitoring.

EXPERIENCE

Cyber Job Simulation — Deloitte Australia (Forage) · Remote Jul 2026

- Investigated a simulated cybersecurity incident using web activity logs, applying SOC analysis, incident-response workflow, and log-investigation techniques to a data-breach scenario.

Software Development Intern — Hope Foundation, Bengaluru Jan – Feb 2025

- Completed a 90-hour internship building a full-stack social media application (HTML, CSS, JavaScript, Python); delivered on schedule with an official completion certificate.

EDUCATION

Master of Computer Applications (MCA) — Cybersecurity, Chanakya University 2025 – 2027 (Pursuing)

Bachelor of Computer Applications (BCA) — East Point College of Higher Education 2022 – 2025 · CGPA: 7.8

CERTIFICATIONS & ACHIEVEMENTS

Cybersecurity – Basic & Intermediate (Simplilearn) • Deloitte Australia Cyber Job Simulation (Forage) • Machine Learning & AI (Hope Foundation) • Python for Beginners (Great Learning Academy) • Adobe University Hackathon 2026 participant (Adobe × Unstop) — deployed a live AI application as an MCA fresher

LANGUAGES

Kannada (Native) • English (Professional Working Proficiency) • Hindi (Conversational)
